Handle Sizes Explained

'Centres' describes the distance between the middle of each fixing hole on a handle.

The overall length of a handle will be bigger than the centres size, although this will vary on a style by style basis. To help give you an idea of which handles are best for you we've provided a handy guide here which features some of the most common centre sizes.

Price Bands

Every handle is different so to make things easier we've created three bands to help group together ones of similar cost. A handles band can be identified by the icon which accompanies the rest of the information.

STANDARD

The ideal choice for both form and function, these handles will provide the perfect finishing touch.

PREMIUM

A little bit different from the norm, these handles will help any design stand out from the crowd.

PREMIUM+

For that extra touch of class these are our highest quality handles, guaranteed to really make a statement.

Cambia Two-Piece Handle

PREMIUM

Cambia handles allow the choice of two finishes in one handle. Each half, in any finish, can be slotted together to form a single, dual-finish handle. This can then be fitted in either orientation so that a preferred finish is facing up.
